## Magazines For Belcher Hospital Patients

This year it is hoped to raise funds for the renewal of magazine subscriptions for Col. Belcher hospital patients by selling hospital plants. You get a nice plant for your money and the disabled get an interesting magazine to while the time away. Time is one thing a patient has plenty of so let's do what we can to make that time pass pleasantly.

The magazines are sent to the hospital as gifts from Didsbury and Springdale well-wishers, so let's keep it a public gift by purchasing a flower or if you have a plant or two to spare or slips would be very welcome. If you want to start them so much the better, otherwise just bring them in a tin of water to Burke's Red & White Store, as he has kindly offered to sell the plants for us.

All proceeds go to the renewal of magazine subscriptions. No commission or expense is taken out. Thank you.—Mrs. J. R. McDonald.

**TRACTOR FACTORY TO OPERATE IN SOUTH AFRICA**

A British firm of light farm tractor manufacturers, which sold between 7,000 and 8,000 tractors to Union farmers and 30,000 tractor implements since 1948, is planning to produce all the required tractor implements in South Africa. The tractors and implements will be assembled from parts made under license by a number of South African engineering firms.

**Notes From The D.A.**

(By Hugh McPhail, D.A.)

**Planned or Balanced Farming**

A successfully operated farm is a delicately poised organization designed to use wisely every resource available to it. It normally functions through the use of two or more revenue sources, each blended into a whole which provides for the efficient use of land, livestock, labour and capital, and a size of business which permits a respectable income to the operator.

The principles to be followed in outlining complete farm plans will usually cover six points:

1. A land use program that will bring the maximum income over a period of years and at the same time will maintain fertility and control erosion.
2. A livestock system adjusted to the amount and kinds of feed that will be grown, the market available, the operators skill and knowledge.
3. Consideration of the labour available and means toward its efficient use.
4. The provision of power and machinery through ownership, purchase or custom work to do the work at the least possible cost.
5. The development of a business which will be sufficiently large to provide a reasonable net income for the farm family.
6. A choice of enterprise that will fit together well and give proper balance to the business as a whole.

**CLOTH SQUEEZE**

The impact of defence orders is building up in Canada's woolen and worsted industry. Just where it will hit first can't be foreseen yet, but there's a price increase of from 10 to 15 per cent shaping up for fall. Shortages may develop in some lines.

One thing seems certain: capacity operations are assured for almost everyone in the industry for 1951.

Up to March 1952, Canadian Commercial Corp. will require eight million yards of woolen and worsted fabrics for uniforms, overcoats, etc. That's about 30 per cent of last year's entire civilian requirements.

And these are only three of many expense items. Yes, today more than ever, it costs money to run a bank.

Made of aluminum, new box-like mousetrap is said to be a safe gadget to have around the house. There is no danger of babies or pets getting in it instead of mice. And for a squishy house-wife the trapped rodents can be disposed of without handling.

**LADINO CLOVER RESEEDS ITSELF**

Ladino clover has the ability of reseeding itself fairly satisfactorily, according to tests conducted by the Department of Agriculture's Forage Plants Division at Ottawa.

Completely killed during the winter of 1949-50, a Ladino pasture by the late summer of 1950 had produced a 40 to 73 per cent stand which yielded up to 4,556 pounds per acre of dry matter from seed in the ground.

**HIGH YIELDS OBTAINED FROM LADAK ALFALFA**

For 18 years Ladak has outyielded Grimm and other varieties of alfalfa by 14 per cent at the Experimental Station, Beaverlodge, Alberta, and has consistently outyielded all varieties in tests made at the Experimental Station, Melville, Saskatchewan.

Department officials point out that Ladak has particular merit in regions where only one cutting is possible, as this variety of alfalfa yields heaviest in the first cutting.

The local men were called out Monday morning to put out a serious chimney fire at the home of Mr. and Mrs. Garnet Brown. The flames were fanned by a strong wind and had it not been for the quick work of the men and the use of several fire extinguishers great damage might have been done.

### M.V.B.C. NEWS

Thursday evening, April 5, at the United Missionary Church was held the John Rydud Memorial Speech Award Contest, and other features in speech work. The contest consisted of the reciting from memory and giving good interpretation of suitable portions of Scripture. The four contestants were Bertha Young, Jean Burkholder, William Cox and Arthur Eby. The two selected by the judges to receive the two cash awards were Arthur Eby, first, who receives \$10 in cash, and Jean Burkholder, second, who receives \$5 in cash.

Other items on the program were an open discussion by members of the Foundations of Speech Class on the subject, "Is Bible College Training necessary to make a successful Christian?" Also a dramatic reading, "Out of the Night," by Jeanette Neufeld, and "The Old Violin," read by Peter Waldin.

The concluding feature was an adoption of the Book of Ruth, entitled "The Promised Redeemer," by Peter Waldin. The personnel participating in this number were the Advanced Speech Class.

The Campus was rather a quiet place over the week-end. The 30 member Choir was away to Edmonton, Redwater and Red Deer. Other students and faculty members were elsewhere. But on Saturday afternoon the few left here loaded food and themselves in the truck and travelled west to the Little Red for a Weiner roast.

### UNITED STATES VALUED AS FISH MARKET BY CANADA

Of the latter figure, the Pacific Coast area contributed fresh, frozen and smoked fish to the value of \$15 million; the Atlantic Coast area, \$32 million; and the inland area of Canada, \$17 million.

## WHEAT BOARD PAYMENTS

A total of close to \$189 million have been distributed to the grain producers of Western Canada when current Wheat Board payments are completed. These payments include \$120 million, being the final payment on the 1945-49 pool in wheat, and \$68,900,000, being the interim payment on deliveries of wheat, oats and barley from the 1950 crop.

Alberta farmers' share of these payments will be approximately \$36.4 million. During the past month cheques have been going out covering the interim payment, the first to be sent out being oats and barley. Now that the House of Commons has passed the \$65 million grant to the Wheat Board, the final payment on the above mentioned pool in wheat will soon be in the process of distribution.

## AUSTRALIAN WHEAT ESTIMATES
